#### **Notices**

Knowledge and best practice in this field are constantly changing. As new research and experience broaden our understanding, changes in research methods, professional practices, or medical treatment may become necessary.

Practitioners and researchers must always rely on their own experience and knowledge in evaluating and using any information, methods, compounds, or experiments described herein. In using such information or methods they should be mindful of their own safety and the safety of others, including parties for whom they have a professional responsibility.

To the fullest extent of the law, neither the Publisher nor the authors, contributors, or editors, assume any liability for any injury and/or damage to persons or property as a matter of products liability, negligence or otherwise, or from any use or operation of any methods, products, instructions, or ideas contained in the material herein.

#### **Library of Congress Cataloging-in-Publication Data**

A catalog record for this book is available from the Library of Congress

#### **British Library Cataloguing-in-Publication Data**

A catalogue record for this book is available from the British Library

ISBN: 978-0-12-818501-8

<i>Contributors</i>	<i>xi</i>
<i>Preface and Acknowledgments</i>	<i>xv</i>
<b>1. Overview on lightweight, multifunctional materials</b>	<b>1</b>
Carlos M Costa, Pedro Costa <i>and</i> Senentxu Lanceros-Mendez	
1.1 Introduction	1
1.2 Multifunctional materials classification and types	3
1.3 Lightweight multifunctional materials	14
1.4 Conventional preparation techniques	15
1.5 Application areas	18
1.6 Conclusions	19
Acknowledgments	19
References	20
<b>2. Additive manufacturing of multifunctional materials</b>	<b>25</b>
P. Martins, V. Correia <i>and</i> S. Lanceros-Mendez	
2.1 Introduction	25
2.2 Research scenario	27
2.3 Future trends	37
Acknowledgments	39
References	39
<b>3. Porous, lightweight, metal organic materials: environment sustainability</b>	<b>43</b>
Ainara Valverde, Paula G.-Sainz, Joseba Orive, Edurne Larrea (S.), Ander Reizabal-Para, Gabriel Tovar, Guillermo Copello, Juan Manuel Lázaro-Martinez, Bárbara Rodriguez, Bárbara Gonzalez-Navarrete, Yurieth Quintero (Marcela), Maibelin Rosales, Andreina García, María I. Arriortua <i>and</i> Roberto Fernández de Luis	
3.1 Introduction	43
3.2 Requirements of MOF materials for metal ion recovery	46
3.3 Crystal chemistry and functionalization strategies of water-stable metal organic frameworks for metal ion revalorization	54
3.4 Inorganic ionic species uptake by metal organic framework	67
3.5 Future perspectives and concluding remarks	119

Acknowledgments	120
References	120
<b>4. Multifunctional materials for clean energy conversion</b>	<b>131</b>
R. Krishnapriya, Devika Laishram, M. Shidhin <i>and</i> Rakesh K. Sharma	
4.1 Introduction	131
4.2 Energy conversion devices	132
4.3 Multifunctional nanomaterials for energy conversion applications	135
4.4 Conclusion	147
Acknowledgments	147
References	147
<b>5. Advances in thermochromic and thermoelectric materials</b>	<b>153</b>
Ahmed Esmail Shalan, Nikola Peřinka, Esraa Samy Abu Serea <i>and</i> Mohamed Fathi Sanad	
5.1 Introduction	153
5.2 Thermochromic and thermoelectric materials and devices	156
5.3 Applications of thermochromic materials and devices	157
5.4 Applications of thermoelectric materials and devices	171
5.5 Summary and perspective	180
Acknowledgments	181
References	181
<b>6. Lightweight, multifunctional materials based on magnetic shape memory alloys</b>	<b>187</b>
Daniel Salazar-Jaramillo, Jose M. Barandiaran, Manfred Kohl, Daoyong Cong, Hideki Hosoda, Jose Luis Sanchez Llamazares <i>and</i> Volodymyr A. Chernenko	
6.1 Introduction	187
6.2 FSMA/Polymer composites for magnetic actuation and mechanical damping	189
6.3 Porous FSMA materials	195
6.4 MSMA thin films and related nanostructures	196
6.5 MSMA thin wires	210
6.6 MSMA thin ribbons and processing	219
6.7 Conclusions	224
Acknowledgments	147
References	226

---

<b>7. Piezoelectric polymers and composites for multifunctional materials</b>	<b>239</b>
Kuntal Maity <i>and</i> Dipankar Mandal	
7.1 Introduction	239
7.2 Piezoelectricity	242
7.3 Piezoelectric polymers	246
7.4 Piezoelectric polymer composites	255
7.5 Multifunctional applications	261
7.6 Conclusion and perspectives	274
Acknowledgments	276
References	277
<b>8. Advances of electrochromic and electro-rheological materials</b>	<b>283</b>
R. Alves <i>and</i> M.M. Silva	
8.1 Advances of electrochromic materials	283
8.2 Advances of electro-rheological materials	300
8.3 Conclusions	307
Acknowledgments	308
References	308
<b>9. High deformation multifunctional composites: materials, processes, and applications</b>	<b>317</b>
Pedro Costa, J. Nunes-Pereira, Carmen R. Tubio, J.R. Dias <i>and</i> S. Lanceros-Mendez	
9.1 Introduction	317
9.2 High deformation piezoresistive polymers	319
9.3 Conductive reinforcement materials	322
9.4 Functional materials	325
9.5 Printable applications of piezoresistive composites	335
9.6 Conclusions	343
Acknowledgments	343
References	343
<b>10. Magnetoelectric composite materials: a research and development case study</b>	<b>351</b>
Kenji Uchino	
10.1 Multiferroic materials	351
10.2 History of magnetoelectric composites	363

---

10.3	Designing of ME laminate composites	374
10.4	Magnetolectric applications	385
10.5	Summary	388
	Acknowledgments	388
	References	388
<b>11.</b>	<b>Magnetic field into multifunctional materials</b>	<b>391</b>
	<i>P. Martins and S. Lanceros-Mendez</i>	
11.1	Introduction	391
11.2	From high weight to lightweight	394
11.3	From idea to applications	396
11.4	Final remarks and future perspectives	402
	Acknowledgments	403
	References	403
<b>12.</b>	<b>Multifunctional materials based on smart hydrogels for biomedical and 4D applications</b>	<b>407</b>
	<i>Sheila Maiz-Fernández, Leyre Pérez-Álvarez, Leire Ruiz-Rubio, José L. Vilas-Vilela and Senentxu Lanceros-Méndez</i>	
12.1	Introduction	407
12.2	Thermoresponsive hydrogels	411
12.3	pH responsive hydrogels	420
12.4	Photoresponsive hydrogels	424
12.5	Electrical-responsive hydrogels	431
12.6	Magneto-responsive hydrogels	443
12.7	Conclusions	452
	Acknowledgments	455
	References	455
<b>13.</b>	<b>Antimicrobial lightweight materials and components</b>	<b>469</b>
	<i>A. Gala Morena, Guillem Ferreres, Kristina Ivanova, Sílvia Pérez-Rafael and Tzanko Tzanov</i>	
13.1	Introduction	469
13.2	Antimicrobial components	471
13.3	Antimicrobial, lightweight materials	478
13.4	Conclusions	495
	Acknowledgments	495
	References	496
